## Problem Solving • Model Subtraction

**COMMON CORE STANDARD—1.OA.A.1**  
Represent and solve problems involving addition and subtraction.

Read the problem. Use the model to solve. Complete the model and the number sentence.

1. There were 7 ducks in the pond. Some ducks swam away. Then there were 4 ducks. How many ducks swam away?

$$\underline{7} - \underline{\quad} = \underline{4}$$

2. Tom had 9 gifts. He gave some away. Then there were 6 gifts. How many gifts did he give away?

$$\underline{9} - \underline{\quad} = \underline{6}$$

3. Some ponies were in a barn. 3 ponies walked out. Then there were 2 ponies. How many ponies were in the barn before?

$$\underline{\quad} - \underline{3} = \underline{2}$$

4. Choose a model from a problem you solved. Write a new subtraction problem to match.

---

---

---

## Lesson Check (1.OA.A.1)

1. Complete the model and the number sentence. There are 8 shells. 6 shells are white. The rest are pink. How many shells are pink?

$$\underline{8} - \underline{6} = \underline{\quad}$$

---

## Spiral Review (1.OA.B.3, 1.OA.C.6)

2. Circle the number sentences that show the same addends in a different order.

$6 - 2 = 4$

$2 + 4 = 6$

$4 + 2 = 6$

- 
3. What is the sum? Write the sum.

$$\begin{array}{r} 4 \\ + 3 \\ \hline \end{array}$$
